## Feature Articles : 2009: The Magic of a Universal '11' Year

Welcome to 2009, a Universal year of 11 vibrational energy ( $2+0+0+9 = 11$ ).

There has not been a Universal 11 year since 1910, thus well over 99% of the worlds population have never experienced a Universal 11 year vibration in their lifetime... so this is a biggy for our entire planet !

In numerology the number 11 is a Master Number - 'Master' meaning it is of intense/high vibrational frequency and works within the etherical, magical and transcendental realms of creation. Master numbers possess great potential for learning and growth, and can bring major transformations in life.

The number 11 is the most intuitive number and is a clear channel to the subconscious. It is the number of leadership, personal power and spiritual truths. The number 1 by itself represents leadership, initiative and new beginnings... thus two number 1's together opens a gateway of potential far greater than the sum of its parts.

The gateway of the Master Number 11, is the freedom of choice. The freedom to choose a path of truth, authenticity & Love, or conversely to recoil in fear, pain and stagnation. Thus the 11 Universal vibration year will bring about a planetary rLOVEution of grand proportions and connect EARTH back to the HEART (just move the H from the end to the beginning) of LOVE (Live, One, Vibrational, Energy).

With Pluto (transformation) sitting in the sign of Capricorn (hardwork, honesty, integrity) until 2024 and also in January 2009 Jupiter (expansion) sitting in Aquarius (humanitarian, visionary) for the next 12 months... our 2009 vibrational 11 year is being powered by visionary & humanitarian principles of change. Change for the greater good of all.

This change is happening now from the ground up, and we are noticing the effects around us as we witness the breaking down of outmoded authority structures, governments, financial markets and religion. In a Universal 11 year, we have the choice to react to these changes in fear, or actively participate in the re-building of a new society with LOVE. The choices we make this year, in a Universal 11 year have the potential to facilitate great leaps in the collective consciousness of our planet... we are INDIVIDUALLY & COLLECTIVELY the PIONEERS of change.

What we will see around the planet during 2009 are more and more people seeking answers to life's questions, and waking up from the deep sleep or hypnotic trance of illusion. People from all nations, religions, walks of life will be propelled to speak up, express their truths and seek the truth from those in positions of power.

There is power in the masses, and the Universal 11 year will bring this to the fore.

My suggestion for 2009 is to utilize the Universal 11 energy to its highest level of resonance by taking self-responsibility for all your actions. In numerology the word 'VIBRATION' is the number 11, so what 'VIBRATION' are you creating in the world? Are your thoughts, actions, emotions representative of your greater personal and hence collective vision, or is your VIBRATION working the 11 energy in fear?

You have the choice to align your 11 VIBRATION in Love, Compassion & Unity ... what are you going to choose in each moment throughout 2009.

As you make a list of your choices, your visions for a greater self, and the goals and dreams of life during 2009, take a moment to reflect on other '11' words in numerology that you may like to consciously work with 2009 to move through the gateway of LOVE.
